Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 34 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is not certain what is meant by "conventional textile manufacturing processes," since any number of manufacturing processes can be deemed to be "conventional."

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
 2. Ascertaining the differences between the prior art and the claims at issue.
 3. Resolving the level of ordinary skill in the pertinent art.
 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
4. Claims 33-41 are rejected under 35 U.S.C. 103(a) as being unpatentable over Martin et al. (6,042,605). Martin et al. disclose, in figures 1-11 and in col. 6, line 47 to

Art Unit: 3731

col. 7, line 54; col. 8, lines 65-67, and in col. 14, lines 4-6, the invention substantially as claimed. Martin et al. disclose an endoluminal prosthesis with an elongate, ePTFE tubular member (4), a structural support member (6); and an elongate, PTFE securement member (8) that is a flat, thin suture helically arranged with respect to the longitudinal axis of the tubular member. The securement member secures the structural support member to the exterior surface of the tubular member, and the securement member is adhered to the tubular member, non-continuously or continuously (see col. 7, lines 44-54). However, Martin et al. do not disclose a width of the securement member to be less than .60 mm (Martin et al. do disclose a width of .635 mm). Nevertheless, it would have been a matter of design choice to size a securement member, so that it has a width that is less than .60 mm. As disclosed by Martin et al. in col. 7, lines 14-19, a width of the securement member can be chosen according the desired properties of the prosthesis (radial stiffness, burst pressure, and porosity).

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Mano et al. (Re.31,618), Popadiuk et al. (5,556,426), and McIntyre et al. (5,976,192) teach prostheses with tubular members and securement members.
